

ISHAAN VINAY CHANDAK

A-301, Amazon CHS LTD, Jairaj Nagar, Off Link Road, Borivali-W, Mumbai-91

Email: [Ishaan Chandak](#); Phone: +91-9594730511; [Github](#); [LinkedIn](#)

OBJECTIVE

Software Engineer with professional experience in building scalable systems seeking to pursue an MS in Computer Science with a specialization in Artificial Intelligence and Machine Learning. Aiming to master advanced algorithmic design, data modeling, and machine learning architectures to transition into high-impact Software Engineering and Quantitative Development roles within the tech industry.

EDUCATION

Bachelor of Technology in Information Technology
Veermata Jijabai Technological Institute (VJTI)

CGPA: 9.00/10
December 2021 – May 2025

Relevant Coursework: Linear Algebra, Statistics & Probability, Discrete Mathematics, Data Structures, Compiler Design, Computer Architecture, Operating Systems, Computer Networks, Big Data Analytics, Database Management, Artificial Intelligence, Machine Learning, Software Engineering, and Parallel Computing.

ACADEMIC PROJECTS

[Multi-Task Learning for Mango Attributes Detection](#), VJTI Mumbai

December 2024 – May 2025

Team Size: 4

Role: Team Lead

The project aimed to develop an automated computer vision system for mango detection and classification based on size and ripeness, enabling more efficient agricultural quality assessment, using multi-task learning, object detection, Faster R-CNN, ResNet-50 FPN, depth estimation using MiDaS, geometric feature extraction, PyTorch, XGBoost, and Random Forest. Apart from leading the team, the end-to-end pipeline was designed, and a multi-task Faster R-CNN model with a shared ResNet-50 FPN backbone was developed. MiDaS depth maps were integrated with geometric features from 972 annotated instances to address perspective ambiguity in size classification, while team coordination contributed to a 13.37% improvement in classification accuracy. This project helped in understanding translating real-world problems into end-to-end ML solutions, work with imperfect data, and make practical model and feature-engineering decisions, and strengthened the ability to delegate, collaborate, and evaluate competing approaches.

[DermAI \(Dermatological Disease Classification\)](#), VJTI Mumbai

September 2023

Team Size: 5

Role: Team Member

The project aimed to develop an AI-based computer vision system for preliminary classification of dermatological diseases from skin lesion images, using Deep learning, convolutional neural networks (CNNs), image classification, image preprocessing and augmentation, OpenCV, PyTorch, and TensorFlow/Keras. As a team member, contribution revolved around preprocessing and augmentation of clinical skin lesion images and the development and evaluation of CNN-based classification models, and improved the image processing pipeline to enhance feature extraction and reduce overfitting. The project involved understanding how to build and evaluate deep learning models for real-world medical image data and gained practical experience in image preprocessing, model evaluation, and addressing challenges such as limited and variable-quality datasets.

WORK EXPERIENCE

Analyst, Goldman Sachs, Bengaluru

July 2025 – Present

- Enterprise workflow automation and real-time synchronization: responsible for **designing** and **deploying** scalable Java microservices (**Quarkus**) that bridge internal engines with Microsoft Power and Teams.
- Hybrid AWS data pipeline architecture: **building** and **maintaining** cloud ETL workflows using S3, Lambda, Glue, EventBridge, SQS, and Aurora to ingest **15+ enterprise datasets** into **Celonis** for process mining.
- **Overseeing enterprise data governance** by integrating Microsoft Presidio, approval workflows, and IAM/KMS security controls to ensure zero PII exposure across ingested pipelines.
- Production service reliability: **analyzing distributed logs** and API flows to resolve complex cross-system integration issues and optimize backend uptime.
- **Collaborating across 4 cross-functional teams** to guide core architecture discussions and influence technical decision-making for enterprise software initiatives.

INTERNSHIPS

Summer Analyst, Goldman Sachs, Hyderabad

June 2024 – July 2024

- Operational workflow automation: **architected and deployed** a production-grade automated reporting pipeline in Golang, eliminating 100% of manual effort for weekly business reporting workflows.
- **Engineered modular backend microservices** with structured logging, fault-tolerant error handling, and unit testing suites to maximize system uptime and maintainability.
- Process optimization and CI/CD: **integrated internal APIs and automated deployments** via GitLab CI/CD, reducing operational overhead by 40% and accelerating release cycles.

Web Development Intern, Techlignce Pvt. Ltd., Remote

November 2023 – January 2024

- Developed responsive React.js and Redux Toolkit features and built a code transfer pipeline to directly send compiled application data to embedded hardware devices

Software Intern, Indian Oil Corporation Limited, Mumbai

June 2023 – August 2023

- Automated data workflows and nomination tracking: **built automated validation and conflict-detection scripts** using Google Apps Script and Google Sheets to streamline administrative processes.
- **Interactive performance analytics**: Designed **1** interactive Looker Studio dashboard tracking **3+** core operational performance metrics and employee training trends for leadership
- Internal process optimization: **Streamlined weekly reporting pipelines**, saving 3–4 operational hours per week while eliminating manual entry errors.

TECHNICAL SKILLS

Languages: Python, C++ (3 yrs), Golang (1 yr), HTML/CSS (3 yrs), SQL (2 yrs)

Libraries & Frameworks: OpenCV, NumPy, Pandas, Matplotlib, PyTorch/TensorFlow (2 yrs), React/Redux (1 yr)

Databases & Cloud Storage: AWS S3/DynamoDB (1+ yrs), SQL (2 yrs), Firebase (1 yr)

Developer Tools & Environments: Git/GitHub, VS Code (3+ yrs), Linux (2+ yrs), Docker, GitLab CI/CD (1 yr)

CERTIFICATIONS/WORKSHOPS/ADDITIONAL COURSES

[Machine Learning Specialization](#), DeepLearning.AI & Stanford University (Coursera)

April 2024

[Google Study Jam Workshop](#), Online

October 2023

ACHIEVEMENTS/CO-CURRICULAR/EXTRACURRICULAR

- **All India Rank (AIR) 9 | Codex Competitive Programming Contest, IIIT Sri City** **2024**
National top 10 among thousands of participants under strict time constraints.
- **State Rank 100 | MHT-CET Engineering Entrance Examination** **2021**
Achieved a **99.83 percentile** out of over 400,000 candidates across Maharashtra state to secure admission to VJTI.

LEADERSHIP ROLES

Execution Head, Pratibimb, VJTI

2024

- Led cross-functional planning and logistics for Pratibimb, VJTI's national-level cultural festival with ~20,000 annual footfall, coordinating inter-departmental teams and vendors to deliver 30+ cultural competitions and events.

Executive Co-ordinator, Community of Coders (CoC), VJTI

2023 – 2024

- Organized technical hands-on workshops and bootcamps for 800+ VJTI students to foster a competitive programming and software development culture across campus. Mentored 10+ junior students in data structures, algorithms, and technical problem-solving, improving active club engagement.

COMMUNITY INVOLVEMENT

Grant Proposal Team Member, Healing Fields Foundation

July 2026

- Co-authored a USD 250,000 grant proposal pitch deck for Healing Fields Foundation to expand healthcare access and promote economic empowerment for women in rural communities.

Volunteer, Community TeamWorks Goldman Sachs

June 2023

- Contributed to Goldman Sachs' Community TeamWorks (CTW) initiative through hands-on volunteering, including building dog beds for animal welfare organizations and painting school facilities serving underprivileged students.
